CLASSIC STYLE is the specially developed H/C for the classic parachuting events, accuracy and style.

CLASSIC STYLE fits the large main canopy (all sizes of ParaFoil and alike), medium and small reserve. Such arrangement provides high center of gravity which is one of the basic demand for the individual style performance. Harness in this model with the raised point of the basic ring (three ring system is higher than standard) as well as the chest web rings offer the diver clear view of the target in lower sphere necessary in vertical down drop.
